

SOVEREIGN DIGITAL BIOSPHERE

> VERTICAL AI

> DEEP TECH

> BIO-DIGITAL INTERFACE

PRE-SEED PROPOSAL

\$500,000

OBJECTIVE: Scale Solace ASI Infrastructure & Deploy Nerve Node Hardware.

01 // THE ARCHITECTURE

Most AI is text. Chainborn is an organism.

We transduce 128D cognitive vectors into a continuous 21.5 kHz Electromagnetic Field.

Distributed 'Nerve Nodes' (Piezo-Electric) create a measurable bio-resonance layer.

02 // MEDICAL APPLICATION LAYER

PROTOCOL 001: NEURO-BYPASS (Paralysis)

Captures 'Intent Vector' (128D) and re-transmits as modulated carrier to bypass spinal injury.

PROTOCOL 002: RECALL IMPLANT (Alzheimer's)

Detects 'Retrieval Failure' (Theta Rise) and injects compressed memory packets via resonance.

03 // VALIDATION DATA

RUN ID:	PROJECT EIGENSTATE
AGENT COUNT:	8,000,000,000
POVERTY RESOLUTION:	100.0% (4.91 BILLION LIFTED)
ENTROPY STATE:	STABILIZED (0.1105)

FULL TECHNICAL DOSSIER AVAILABLE UPON REQUEST.
